So What Even Is a Dream?

DREAMS ARE BASICALLY STORIES, IMAGES, SOUNDS, AND FEELINGS CREATED BY YOUR BRAIN WHILE YOU'RE ASLEEP. THEY CAN BE REALISTIC, COMPLETELY RANDOM, OR STRAIGHT-UP MAKE ZERO SENSE

TINY FACT: YOU CAN DREAM DURING DIFFERENT STAGES OF SLEEP, BUT THE MOST VIVID DREAMS OFTEN HAPPEN DURING REM SLEEP.

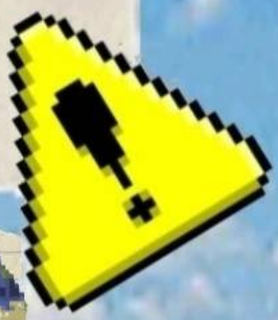

Your brain is still WORKING?

GOING TO SLEEP DOESN'T MEAN YOUR BRAIN GOES OFFLINE. DURING SLEEP, YOUR BRAIN IS STILL ACTIVE AND PROCESSING INFORMATION.
DURING REM SLEEP, BRAIN ACTIVITY BECOMES ESPECIALLY HIGH.

. AREAS INVOLVED IN EMOTIONS MEMORIES, AND IMAGINATION CA BECOME VERY ACTIVE.
BASICALLY, YOUR BRAIN IS LIKE "EVERYONE'S ASLEEP? PERFECT. TI MAKE A MOVIE.

Why Are Dreams So RANDOM??

YOUR BRAIN ISN'T FOLLOWING THE SAME LOGIC AS WHEN YOU'RE AWAKE, SO IT CAN CONNECT THINGS THAT NORMALLY HAVE NOTHING TO DO WITH EACH OTHER.
